WELCOME TO FAROE ISLANDS

In 2007, the National Geographic, conducted a comprehensive survey of 111 island communities throughout the world. A panel of 522 well-travelled experts in sustainable tourism assessed the islands rating them on a list of the most unspoiled. The Faroe Islands came out on top as the most appealing destination in the world; "*Lovely unspoiled islands - a delight to the traveler*".

All COVID restrictions are removed.

Five fun facts about the Faroe Islands:

1. Faroe Islands consists of 18 main islands

The Faroe Islands contains more than 750 islands, islets and skerries. But it is the 18 main islands that really define the nation. Of the 18, just one is uninhabited. The largest in size – Streymoy – is also the most populated as it is home to the capital Torshavn. More than 10,000 people live on the second-largest island Eysturoy, which is also the second largest in size.

2. The Faroe Islands are an autonomous territory of Kingdom of Denmark

Or more specifically, the islands form a self-governing overseas administrative division of the Kingdom of Denmark, in much the same way as Greenland.

3. There are more sheep than people

There are approximately 70,000 sheep living on the islands. The last official human population estimate of the Faroe Islands was just 53,358. The population is however increasing.

4. Scenes from James Bond, No time to Die, were filmed here

Kalsoy island was the setting for Safin's island in the third act of the movie. The visually striking coastline became the location for one of the most memorable ever moments in any James Bond movie.

5. Buses are free to use in the capital

The eight bus routes in and around Torshavn municipality are free to use. However, you may not need them. Just 20,000 people live in the municipality and so the town's sights are mostly within comfortable walking distance.

Travel elsewhere in the islands is relatively inexpensive thanks to heavy government subsidies especially on the ferries that provide an essential link between the island communities.

Social activities:

The Tarv:

THE TARV is a high-end grill house serving a wide selection of charcoal-grilled beef, lamb and seafood. Treat yourself while soaking up the Vágssbotnur marina atmosphere.

Menu:

- ◆ Faroese monkfish ceviche
- ◆ Faroese langoustine and scallops
- ◆ Family Farm filet, Finland
- ◆ Chocolate cake with vanilla ice cream
- ◆ Aperitif, wine, coffee and avec

Meeting point: Restaurant Tarv

Distance: Within 40 min. walking distance from Hotel Føroyar

Address: Undir Bryggjubakka 3-5, FO-100 Tórshavn

Website: www.tarv.fo

Vestmanna Sea Cliffs:

The Vestmanna Sea Cliffs are a natural wonder and a must-see experience while in the Faroe Islands. Sheer mountain sides, towering sea stacks, and rich birdlife is what you will explore on this two hour boat tour.

These cliffs make up 5 kilometers of the coastline on Streymoy island north of Vestmanna. There is a fantastic wildlife here as birds are nesting in the cliffs and thrive flying in the untouched surroundings.

Please bear in mind that the weather in the Faroes can be very different from place to place. This also means that you can not estimate the weather in Vestmanna by looking at the weather in for example Tórshavn.

Meeting point: Hotel Føroyar at 17:45. Bus leaving at **18:00**.

Gala Dinner in the banqueting hall at Hotel Føroyar:

Menu:

- ◆ Langoustine Soup with prawns and creme fraiche
- ◆ Beef Tenderloin with parsnip purée, grilled scallion and buttered carrot and steamed potatoes
- ◆ Rhubarb trifle with chantilly cream
- ◆ Aperitif, wine, coffee

Dress code: Business casual

The Best in Practice

Scandinavian Society of Periodontology was founded at a meeting in Gothenburg on April 22, 1972 (see: Jacobson L, Theilade J. The Scandinavian Contribution to Modern Periodontology, ScSP 1998).

Today, with it's over 150 members, the society plays an important role in promoting continuing education and training in periodontology for the Scandinavian periodontists, while protecting the Scandinavian traditions and visions.

As stated in its constitution, the primary objective of The Scandinavian Society of Periodontology is to promote and further the development of the clinical and scientific position of periodontology in The Nordic countries, Denmark, Iceland, Finland, Norway and Sweden) through objective information by:

- Uniting people actively working within the field of periodontology
- Promoting research activity in periodontology and bordering disciplines
- Conveying knowledge on the etiology, therapy and prevention of periodontal diseases including the influence of periodontal diseases in general medical conditions as well as general medical conditions influence on periodontal diseases to members and the general public
- Organizing and encouraging meetings, courses, meeting activities and publication within the field of periodontology and bordering disciplines
- Promoting periodontal health for patients and cooperation within the field of periodontology through international contact and joint venture with other national or regional societies of similar nature.
